Linked Text/s

Explanation - How do you look after a sunflower?

Slicky Knowledge

Weather changes every day and can be different in different places.

Climate describes what the weather is usually like over time.

We can measure the weather using tools like thermometers and rain gauges.

Weather data can be collected, recorded and shown in charts.

Different parts of the world have different climates.

Key Dates

1824 – The first thermometer was invented to measure temperature accurately.

1861 – The Met Office was set up to record and forecast weather in the UK.

Every day – Weather is observed, measured and recorded.

Aspirations

Meteorologist
Weather presenter
Scientist
Data analyst

Skills

I can explain the difference between weather and climate

I can read a weather map

I can collect, record and present weather data

I can analyse weather data and evaluate our fieldwork
