

Geography Towns Year group 3

Subject Specific Vocabulary

geography	Geography is learning about places, people, and the world we live in.
land use	How people use land in different ways. It's about what we build or grow on the land to help us live, work, and play.
settlement	A settlement is a place where people live. A settlement can be a hamlet, village, town or city.
fieldwork	Going outside the classroom to learn more about a place by looking, listening, and exploring.
data	Facts and information we collect to help us learn about places, people, and the land.

Sticky Knowledge

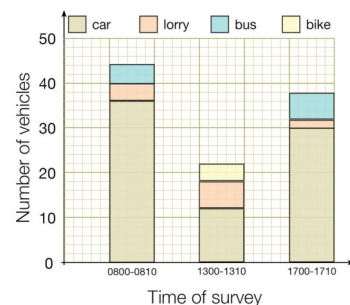

People use land for different purposes. The things that humans build are called human features,

Where humans decide to settle depends upon what is available in the area. The requirements for a settlement can be listed as either essential and desirable.

Human settlements can be different sizes. What we call a settlement will depend on its size and what type of buildings humans have built.

The location of a settlement can be described as being either urban or rural.

Data can be collected and presented in different ways. Bar charts and line graphs are examples of how we can present information.

Skills

- I can describe different types of land use.
- I can identify the important features of a settlement.
- I can give reasons for settlers chose specific places.
- I can record the facilities is our local area.
- I can present and analyse information.

Key Figure/s

Ethel Haythornthwaite(1894–1986)

An environmental campaigner who played a key role in protecting rural land from being built on. Her work helped lead to the creation of our National Parks.

Aspirations

Architect—A person who designs buildings. They make plans to show how something will look and work before it's built.

Surveyor– Someone who measures land and buildings to help people know exactly where things are, how big they are and if they are in the right place.

Key Dates

- 1973—Brandlesholme Shopping Parade built.
- 2010—The Rock Shopping Centre opened.

Learning Links

- English—Bury through the ages
- Maths—learning in statistics about recording, presenting and interpreting data.
- History—where early humans in the Neolithic and Iron Age chose to settle.
