

Geography

Our School Grounds

Year group 1

Subject Specific Vocabulary

Data	is information like little pieces of facts that help us learn about things.
Aerial view	what something looks like from above, like a bird sees flying in the sky looking down.
Map	a picture that shows where places are. It helps us find our way.
Compass	a tool that shows you which way to go. It tells you directions like North, South, East, and West.
Direction	is the way you go to get somewhere.
Fieldwork	when you go outside and discover things about a place.
Observations	are what you notice by looking, listening, or touching things.
Sketches	simple drawings that show places like parks, roads, or houses so we can understand where things are .

Sticky Knowledge

Our school grounds in Old Hall Primary School.

A map is a smaller drawing of a real place. Maps use symbols to show different things.

The four points on a compass are North East, South and West.

Human features are things people have created or built.

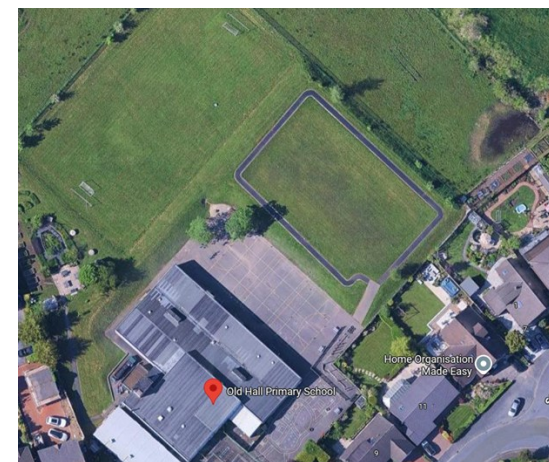

Physical features are natural features that would still be there without humans.
